(a) one block: saturation in l
dotted lines: −log(1 − ρ²)
I(X_S; X_Sᶜ) (nats)
span length l
ρ = 0.95
ρ = 0.85
ρ = 0.75
ρ = 0.60
(b) fixed budget: total grows with k
total (grows with k)
per block (bounded)
per masked token ∝ 1/l
information (nats)
block count k (fixed budget m = 32, l = m/k)
